

The Mepilex family of dressings

Which Dressing	Type of dressing	Function	Level of exudate	Advantages
Mepilex 	Safetac soft silicone foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Low to high	Highly absorbent Excellent fluid handling Soft and comfortable
Mepilex Lite 	Safetac soft silicone, thin foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Low to none	Highly comfortable Thin and comfortable to wear
Mepilex Heel 	Safetac soft silicone foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Low to high	Specially shaped to fit heels Highly absorbent Excellent fluid handling Soft and comfortable
Mepilex Border 	Safetac soft silicone, self-adherent foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Moderate to high	Superior fluid handling; Border prevents fluid leakage; Prevents maceration
Mepilex Border Lite 	Safetac soft silicone, thin self-adherent foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Low to none	Wide range of sizes Ultra comfortable; Comfortable to wear; Border prevents fluid leakage; Prevents maceration
Mepilex Border Sacrum 	Safetac soft silicone, self-adherent foam	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma, prevent infection	Moderate to high	Specifically shaped for sacral wounds. Border prevents fluid leakage and faecal bacterial contamination; Superior fluid handling; Prevents maceration
Mepilex Transfer 	Safetac soft silicone exudate transfer	Absorb exudate, maintain an optimal moist wound healing environment, protect against fluid leakage, protect against trauma	Moderate to very high	Available in large sizes for large wounds Proven on difficult to dress wounds
